

## **AWS Software Engineer – Senior or Principal level**

Titan IC is a world leader in the development of hardware engines for content and network processing. Its solutions are used in all aspects of network security including: Intrusion Detection/Prevention, application detection, and anti-virus.

We are undergoing dynamic growth and are currently seeking an Amazon Web Services (AWS) software engineer to drive the development and deployment of our cloud based products.

Essential skills, qualifications, and experience:

- Honours Degree in Computer Science, Electronic Engineering or related discipline (or equivalent experience)
- Proven experience in development and deployment of a cloud based software product
- Experience using the AWS infrastructure
- Experience setting up and administering AWS accounts and instances
- A good understanding of scripting languages (shell, Python or Perl)
- Experience in development for Linux platforms
- Flexible, organized and able to quickly learn new skills

Desirable skills, qualifications, and experience:

- AWS certification at any level
- Strong C or C++ programming/troubleshooting skills
- Familiarity with multi-threading
- Knowledge of network communication protocols

The successful engineers will interact with the business team and customers at all stages of the product life cycle, utilizing their excellent communication and organizational skills within a fast-paced environment.

Location: Belfast, UK

Package: Up to £60K plus benefits package, depending on experience and skillset.

Deadline: Please send copy of CV, outlining how you meet the above criteria by Wednesday 1st November 2017 to: [d.lavery@titan-ic.com](mailto:d.lavery@titan-ic.com)
